Applied Statistical Analysis Using SPSS for Research and Academic Writing:

Enhancing Research Impact

October 14th - October 18th ,2024

Overview:

This FDP aims to provide participants with practical skills in statistical analysis using SPSS while also focusing on academic research writing and publication strategies. Participants will learn to apply statistical techniques effectively and understand how to present their findings in various formats, including journal articles, book chapters, and blogs.

Objectives of the FDP:

To enhance the research skills of faculty through practical sessions on SPSS for data analysis.

To develop the ability to apply advanced statistical techniques in research.

To provide insights into writing research papers, book chapters, and books for reputed publications.

To guide participants on referencing, conducting thematic literature reviews, and formulating publication strategies, including journal selection and understanding publication costs.

To explore various opportunities for faculty to publish their research in reputed journals.
